Hi Bong Ratanak,

As discussed, I'm handing over the **Workflows** (HR & Maintenance) project to you, effective **August 28, 2026**. Please find the full handover documentation in fileshare path:
\\fileshare.nagaworld.local\ITShares\IT Programming\Development Team\Programmer\24728\handover_documents

Quick summary of what's covered:

- Project overview and key repositories
- Tech stack and local setup steps
- Environments and access requirements
- Known gaps in the CI/CD documentation
- Deep dive on the **Emergency Incident** module as a working example

A few things to flag before you get started:

1. **Access:** You'll need GitLab, Vault, and DevOps access before you can begin development. Please request these as soon as possible, since Vault access needs DevOps approval.
2. **CI/CD pipeline:** I only ever tested locally, so I don't have documented instructions for staging, pre-prod, or production deployment. For any deployment questions, please reach out directly to *Bong Puthi, Bong Malinka, or Bong Chhai*.
3. **Known tech debt:** There's an outstanding migration script from the old production system (K2 Form). Bong Chhai owns this and can give you more context.
4. **Emergency Incident module:** This is scaffolded and installable. Worth reviewing whether these need implementation before production use.

I'm happy to walk through any part of this with you before my last day.

Regards,

Chuon Pisith | IT Programming | Software Development
