

User Acceptance Testing

1. Project Information

Field	Value
Project Name	Workflow
System Name	Car Park Permit
Version	1.0.0
UAT Start Date	[Insert Date]
UAT End Date	[Insert Date]
Prepared By	Software Development Team

2. Purpose

This UAT verifies that the Car Park Permit process works as expected for business users and is ready for production use.

3. Test Scope

- Create a new car park permit request
- Review, approve, reject, or rework a request
- Resubmit a request after rework
- Issue an approved request
- Delegate an approval to another user
- Track request progress and status updates

4. Test Notes

- Use business roles only: Employee, Manager or HoD, and Admin.
- Record the actual result after each test.
- Mark each test as Pass, Fail, or N/A.
- If a request is sent back for rework, update it and submit it again.

5. Test Scenarios

5.1 Request Submission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-01	Request submission	Create and submit a new car park permit request	Employee	User can access Workflow and Car Park Permit	1. Open Workflow.	The request is created successfully and moves to Waiting Approval.		
					2. Go to Car Park Permit.			
					3. Click New Request.	The approver receives a notification.		
					4. Enter the required information.			
					5. Submit the request.			
UAT-02	Request submission	Try to submit a request with missing required information	Employee	User is on the new request form	1. Open a new request.	The system shows a clear message asking the user to complete the missing information.		
					2. Leave one or more required fields empty.			
					3. Click Submit.	The request is not submitted.		

5.2 Review and Approval

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-03	Approval review	Approve a request	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a comment if needed. 5. Click Approve.	The request status changes to Approved and the requester receives a notification.		
UAT-04	Approval review	Reject a request with a reason	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a reason in the comment field. 5. Click Reject.	The request status changes to Rejected and the requester receives a notification with the reason.		

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-05	Approval review	Send a request back for rework	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a comment explaining what must be changed. 5. Click Rework.	The request status changes to Reworked and the requester receives a notification.		

5.3 Rework and Resubmission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-06	Rework handling	Update a reworked request and submit it again	Employee	The request has been returned for rework	1. Open the reworked request. 2. Review the comment from the approver. 3. Update the required information. 4. Submit the request again.	The request is resubmitted and returns to Waiting Approval. The approver receives a new notification.		

5.4 Issuance and Tracking

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-07	Request issuance	Issue an approved request	Admin	The request has already been approved	1. Open My Requests. 2. Open My Request List. 3. Open the approved request. 4. Complete the task. 5. Click Issue.	The request status changes to Issued and the record is ready for business use.		
UAT-08	Request tracking	Check the workflow progress for a request	Any user with access	The request has already moved through at least one step	1. Open the request. 2. Select View Flow.	The workflow progress is displayed clearly so the user can see the current step and history.		
UAT-09	Request tracking	Confirm the request appears in the correct queue	Employee, Manager or HoD, Admin	The request has been submitted or assigned	1. Open the relevant queue. 2. Find the request in the list.	The request appears in the correct list for the current role and status.		

5.5 Delegation

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-10	Delegation	Redirect approval to another person	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Choose Redirected. 5. Select another user. 6. Confirm the action.	The request moves to the selected approver and the original approver no longer owns the task.		
UAT-11	Delegation	Share approval with another person	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Choose Share. 5. Select another user. 6. Confirm the action.	Both users can view and act on the request. The original approver still keeps access.		

6. Acceptance Criteria

The UAT is successful when all critical scenarios pass, no major business issue remains open, and the business users confirm the process is ready for production.
