

User Acceptance Testing

1. Project Information

Field	Value
Project Name	Workflow
System Name	Purchase Request
Version	1.0.0
UAT Start Date	[Insert Date]
UAT End Date	[Insert Date]
Prepared By	Software Development Team

2. Purpose

This UAT verifies that the Purchase Request process works as expected for business users and is ready for production use.

3. Test Scope

- Create and submit a purchase request
- Review, approve, reject, or rework a request
- Resubmit a request after rework
- Complete purchasing as Admin
- Cancel a request during rework
- Delegate approval to another user
- Track request progress and queue visibility
- Generate a printable request report

4. Test Notes

- Use business roles only: Employee, Manager or HoD, and Admin.
- Record the actual result after each test.
- Mark each test as Pass, Fail, or N/A.
- If a request is sent back for rework, update it and submit it again.
- Use realistic data (department, item, vendor, and cost) for testing.

5. Test Scenarios

5.1 Request Submission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-01	Request submission	Create and submit a new purchase request	Employee	User can access Workflow and Purchase Request	1. Open Workflow. 2. Go to Purchase Request. 3. Click New Request. 4. Enter required request, item, and vendor information. 5. Click Submit.	The request is created successfully and moves to Waiting Approval. The approver receives a notification.		
UAT-02	Request submission	Try to submit a request with missing required information	Employee	User is on a new request form	1. Open a new request. 2. Leave one or more required fields empty. 3. Click Submit.	The system shows a clear message asking for missing information. The request is not submitted.		
UAT-03	Request submission	Save a request as draft and reopen it later	Employee	User can create a request	1. Open a new request. 2. Enter partial information. 3. Save without submitting. 4. Reopen the same request.	The request remains in Draft and previously entered data is still available.		

5.2 Review and Approval

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-04	Approval review	Approve a request	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a comment if needed. 5. Click Approve.	The request moves to the next workflow step and the requester receives a notification.		
UAT-05	Approval review	Reject a request with a reason	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a reason in the comment field. 5. Click Reject.	The request status changes to Rejected and the requester receives a notification.		
UAT-06	Approval review	Send a request back for rework	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a comment	The request status changes to Reworked and the requester receives a notification.		

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
					explaining what must be changed. 5. Click Rework.			

5.3 Rework, Resubmission, and Cancellation

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-07	Rework handling	Update a reworked request and submit it again	Employee	Request has been returned for rework	1. Open the reworked request. 2. Review approver comment. 3. Update required information. 4. Submit again.	The request is resubmitted and returns to Waiting Approval. The approver receives a notification.		
UAT-08	Rework handling	Cancel a request instead of resubmitting	Employee	Request is in Reworked status	1. Open the reworked request. 2. Click Cancel. 3. Confirm cancellation.	The request status changes to Cancelled and it is removed from active approval queues.		

5.4 Purchase Completion and Tracking

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-09	Purchase completion	Complete purchase details and finish request	Admin	The request is approved and assigned to Admin	1. Open My Requests. 2. Open My Request List. 3. Open the approved request. 4. Enter purchase details. 5. Click Purchase.	The request moves to completed status and is no longer pending in admin queue.		
UAT-10	Purchase completion	Try to finish purchase with missing required details	Admin	Request is assigned to Admin	1. Open the request. 2. Leave required purchase fields empty. 3. Click Purchase.	The system blocks completion and shows clear validation messages.		
UAT-11	Request tracking	Check workflow progress for a request	Any user with access	Request has moved through at least one step	1. Open the request. 2. Select View Flow.	Workflow progress is displayed clearly, including current step.		

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-12	Request tracking	Confirm request appears in correct queue	Employee, Manager or HoD, Admin	Request is submitted or assigned	1. Open the relevant queue. 2. Find the request in the list.	Request appears in the correct list for the current role and status.		

5.5 Delegation

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-13	Delegation	Redirect approval to another person	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Choose Redirected. 5. Select another user. 6. Confirm.	Request moves to selected approver and original approver no longer owns the task.		
UAT-14	Delegation	Share approval with another person	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Choose Share. 5. Select another user. 6. Confirm.	Both users can view and act on the request. Original approver keeps access.		

5.6 Reporting

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-15	Report generation	Print Purchase Request report	Any user with report access	A Purchase Request record exists	1. Open a Purchase Request record. 2. Click Print. 3. Select Purchase Request Form.	Report is generated successfully and values match the request record.		

6. Acceptance Criteria

The UAT is successful when all critical scenarios pass, no major business issue remains open, and business users confirm the process is ready for production.
