

User Acceptance Testing

1. Project Information

Field	Value
Project Name	Workflow
System Name	Request Document
Version	1.0.0
UAT Start Date	[Insert Date]
UAT End Date	[Insert Date]
Prepared By	Software Development Team

2. Purpose

This UAT verifies that the Request Document process works as expected for business users and is ready for production use.

3. Test Scope

- Create and submit a new request document
- Validate required data before submission
- Review, approve, reject, or rework a request
- Resubmit a request after rework
- Cancel a request when it is no longer needed
- Complete HR/Admin implementation and finalize the request
- Delegate an approval to another user
- Track request progress, queue visibility, and notifications
- Print the request document report

4. Test Notes

- Use business roles only: Employee, Manager or HoD, and Admin/HR.
- Record the actual result after each test.
- Mark each test as Pass, Fail, or N/A.
- If a request is sent back for rework, update it and submit it again.

5. Test Scenarios

5.1 Request Submission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-01	Request submission	Create and submit a new request document	Employee	User can access Workflow and Request Document	1. Open Workflow. 2. Go to Request Document. 3. Click New Request. 4. Enter required information. 5. Click Submit.	The request is created successfully and moves to Waiting Approval. The approver receives a notification.		
UAT-02	Request submission	Try to submit with missing required information	Employee	User is on the new request form	1. Open a new request. 2. Leave one or more required fields empty. 3. Click Submit.	The system shows a clear message asking the user to complete missing information. The request is not submitted.		
UAT-03	Request submission	Verify only allowed document types are used	Employee	User is on the new request form	1. Open Document Type. 2. Check available options. 3. Select a valid type and submit.	Only approved document types are available and the request can be submitted with a valid type.		

5.2 Review and Approval

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-04	Approval review	Approve a request	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a comment if needed. 5. Click Approve.	The request status changes to Approved and the requester receives a notification.		
UAT-05	Approval review	Reject a request with a reason	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a reason in the comment field. 5. Click Reject.	The request status changes to Rejected and the requester receives a notification with the reason.		
UAT-06	Approval review	Send a request back for rework	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Add a comment explaining what must be changed. 5. Click Rework.	The request status changes to Reworked and the requester receives a notification.		

5.3 Rework and Resubmission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-07	Rework handling	Update a reworked request and submit it again	Employee	The request has been returned for rework	1. Open the reworked request. 2. Review the comment from the approver. 3. Update required information. 4. Click Resubmit.	The request is resubmitted and returns to Waiting Approval. The approver receives a new notification.		
UAT-08	Rework handling	Cancel a reworked request	Employee	The request is in Reworked status	1. Open the reworked request. 2. Click Cancel. 3. Confirm action if prompted.	The request changes to Cancelled and is removed from active workflow processing.		

5.4 Implementation, Issuance, and Tracking

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-09	Request implementation	Complete implementation for an approved request	Admin/HR	The request has already been approved	1. Open My Requests. 2. Open My Request List. 3. Open the approved request. 4. Complete the task. 5. Click Done or Issue (based on action label).	The request is completed successfully and the requester is informed.		
UAT-10	Request implementation	Send request back for rework from implementation step	Admin/HR	The request is assigned for implementation	1. Open implementation task. 2. Add comment for required correction. 3. Click Rework.	The request status changes to Reworked and returns to requester with clear action needed.		
UAT-11	Request implementation	Reject request from implementation step	Admin/HR	The request is assigned for implementation	1. Open implementation task. 2. Add rejection reason. 3. Click Reject.	The request status changes to Rejected and requester receives rejection information.		
UAT-12	Request tracking	Check workflow progress for a request	Any user with access	The request has already moved through at least one step	1. Open the request. 2. Select View Flow.	The workflow progress is displayed clearly so users can see current step and history.		
UAT-13	Request tracking	Confirm request appears in the correct queue	Employee, Manager or HoD, Admin/HR	The request has been submitted or assigned	1. Open the relevant queue. 2. Find the request in the list.	The request appears in the correct list for the		

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
						current role and status.		
UAT-14	Request notification	Verify notifications for key status changes	Employee, Manager or HoD, Admin/HR	Notifications are enabled	1. Submit a request. 2. Approve, reject, or rework the request. 3. Resubmit a reworked request.	Correct users receive notifications for submit, approve, reject, rework, and resubmit actions.		
UAT-15	Data accuracy	Verify charge department auto-fills from requester	Employee	Requester has linked employee and department data	1. Create a request. 2. Check Charge To Department field.	Department is auto-filled correctly from requester profile.		
UAT-16	Report output	Generate Request Document report	Employee or Admin/HR	Request exists and user has print access	1. Open the request record. 2. Click Print. 3. Select Request Document report.	Report is generated successfully with correct request details.		

5.5 Delegation

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-17	Delegation	Redirect approval to another person	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Choose Redirected. 5. Select another user. 6. Confirm action.	The request moves to the selected approver and the original approver no longer owns the task.		
UAT-18	Delegation	Share approval with another person	Manager or HoD	A request is waiting in My Approvals	1. Open My Approvals. 2. Open My Request List. 3. Open the request. 4. Choose Share. 5. Select another user. 6. Confirm action.	Both users can view and act on the request. The original approver keeps access.		

6. Acceptance Criteria

The UAT is successful when all critical scenarios pass, no major business issue remains open, and the business users confirm the process is ready for production.
