

User Acceptance Testing

1. Project Information

Field	Value
Project Name	Workflow
System Name	User Access
Version	1.0.0
UAT Start Date	[Insert Date]
UAT End Date	[Insert Date]
Prepared By	Software Development Team

2. Purpose

This UAT verifies that the User Access workflow works as expected for business users and is ready for production use.

3. Test Scope

- Create and submit user access requests
- Add multiple access lines to a request
- Review, approve, reject, or send requests back for rework
- Resubmit a reworked request
- Complete (implement) an approved request and close it
- Delegate approvals (redirect and share)
- Notifications, flow tracking and reporting
- Configuration of Items and Types
- Permissions and attachments
- Edge cases and concurrent approval handling

4. Test Notes

- Use business roles only: Employee, HOD/Manager, HR Review, HR Approval, HR Implementation, Admin.
- Record the actual result after each test.
- Mark each test as Pass, Fail, or N/A.
- Capture screenshots for failures or unclear behaviour.
- If a request is sent back for rework, update it and submit it again.

5. Test Scenarios

5.1 Request Submission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-01	Request submission	Create and submit a new user access request	Employee	User can access Workflow and User Access	1. Open Workflow. 2. Go to User Access. 3. Click New Request. 4. Enter the required information (requester, employee, reason). 5. Add an access line and Submit.	The request is created successfully and moves to HOD Approval (or configured next stage). Approver receives a notification.		
UAT-02	Request submission	Submit request with multiple access lines	Employee	Same as UAT-01	1. Create new request. 2. Add 2–3 access lines with different items/types. 3. Submit the request.	All lines are saved and visible in the request; status is Submission.		
UAT-03	Validation	Prevent submission with missing required fields	Employee	User on New Request form	1. Leave one or more required fields blank. 2. Click Submit.	System prevents submission and shows clear messages highlighting the missing fields.		

5.2 Review and Approval

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-04	Approval review	HOD approves a request	HOD/Manager	Request waiting in My Approvals	1. Open My Approvals. 2. Open the request. 3. Review details and attachments. 4. Click Approve.	Request advances to HR Review (or next configured stage). Notification recorded.		
UAT-05	Approval review	HOD rejects a request with reason	HOD/Manager	Request waiting in My Approvals	1. Open request. 2. Add rejection reason. 3. Click Reject.	Request status becomes Rejected and requester receives notification with reason.		
UAT-06	Approval review	HOD sends request back for rework	HOD/Manager	Request waiting in My Approvals	1. Open request. 2. Add rework comment. 3. Click Rework.	Request status becomes Reworked and requester is notified with the comment.		

5.3 Rework and Resubmission

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-07	Rework handling	Update reworked request and resubmit	Employee	Request is in Reworked status with approver comments	1. Open reworked request. 2. Review approver comments. 3. Make required changes. 4. Submit request.	Request returns to the appropriate approval queue and a new notification is sent to approver(s).		

5.4 HR Implementation and Closure

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-08	Implementation	HR implements access and closes request	HR Implementation / Admin	Request is in HR Implementation stage	1. Open My Requests. 2. Open the approved request. 3. Perform implementation tasks. 4. Mark task complete and Close request.	Request status becomes Closed and requester + approvers receive completion notifications.		

5.5 Delegation

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-09	Delegation	Redirect approval to another person	HOD/Manager	Request waiting in My Approvals	1. Open request. 2. Choose Redirected. 3. Select another user and Confirm.	Request moves to selected approver; original approver no longer owns the task.		
UAT-10	Delegation	Share approval with another person	HOD/Manager	Request waiting in My Approvals	1. Open request. 2. Choose Share. 3. Select another user and Confirm.	Both users can view and act on the request. Original approver retains access.		

5.6 Notifications, Tracking and Reporting

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-11	Notifications	Notifications and View Flow	Any user	Request moves between stages	1. Move a request through stages (Submission → HOD → HR Review). 2. Check notifications for requester and approvers. 3. Open request and click View Flow.	Notifications are delivered; View Flow shows current step and history with timestamps.		
UAT-12	Tracking	Request appears in correct queues	Employee / HOD / HR / Admin	Request has been submitted or assigned	1. Open relevant queue. 2. Find the request.	Request appears in the appropriate list for the role and status.		

5.7 Configuration and Permissions

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-13	Configuration	Add Item/Type in configuration	Admin	User has configuration privileges	1. Go to Workflow → Configuration → User Access. 2. Click New under Items or Types. 3. Fill fields and Save.	New record appears in selection lists when creating requests.		
UAT-14	Permissions	Block unauthorized request creation	Restricted user	Test user lacks create permission	1. Log in as restricted user. 2. Attempt to create New Request.	New Request option is not available or access denied message appears.		

5.8 Attachments, Concurrency and Edge Cases

Scenario ID	Business Flow	Test Scenario	Role	Preconditions	Steps	Expected Result	Actual Result	Status
UAT-15	Attachments	Add and view attachment	Employee / Approver	Requester can attach files	1. Attach a document when creating a request. 2. Submit and have approver open the attachment.	Attachment uploads and opens for approver.		
UAT-16	Concurrency	Concurrent approvals conflict handling	Approvers A & B	Request assigned to multiple approvers	1. Approver A loads request. 2. Approver B approves. 3. Approver A then attempts to approve.	System reflects updated status to Approver A and prevents duplicate conflicting actions; user sees informative message.		
UAT-17	Cancellation	Requester cancels a request before approval	Employee	Request is still in Submission or early approval stage	1. Open own request. 2. Choose Cancel (if supported). 3. Confirm.	Request becomes Cancelled (or Closed) and notifications are sent to stakeholders.		
UAT-18	Audit	Audit trail and history verification	Auditor / Admin	Request has activity history	1. Open request. 2. Review history and timestamps.	All actions are recorded with user, timestamp and comments for compliance.		

6. Acceptance Criteria

UAT is successful when all critical scenarios pass, no major business issue remains open, and business users confirm the process is ready for production.

7. User Representative Information & Signature
